

DAY 3 INTERNSHIP REPORT

Python Backend Development Internship

Student Name: Benatic Rithan B

Institution: Kalaingar Karunanidhi Institute of Technology (KIT), Coimbatore

Department: Computer Science and Engineering

Date: 10 June 2026

GitHub Repository

<https://github.com/Benatic705/python-backend-internship>

Topic: Object-Oriented Programming (OOP)

Topics Covered: Classes and Objects, Constructors, Inheritance, Polymorphism, Encapsulation

Assignment: Library Management System

Files Created: class_object.py, inheritance.py, encapsulation.py, polymorphism.py, library_management.py

Activities Completed

Learned OOP concepts, implemented classes and objects, used constructors, applied inheritance, implemented encapsulation and polymorphism, and developed a Library Management System.

Learning Outcomes

Improved understanding of OOP principles, class design, inheritance, encapsulation, and polymorphism.

Status: DAY 3 COMPLETED SUCCESSFULLY
